EDUCATION

Masters in Computer Application Vellore Institute of Technology

09/2022 - Present

Chennai, India

Bachelors in Computer Application Mohanlal Sukhadia University

07/2019 - 09/2022

Udaipur, India

PERSONAL PROJECTS

Research Based Learning (09/2023 - Present)

- Improve the quality of satellite images impacted by Impulse noise through proposed image enhancement algorithms.
- Modified Hybrid Impulsive Noise Removal algorithms helps to remove isolated pixel noise from the images.
- Evaluate the effectiveness of the suggested algorithms in enhancing the clarity and overall quality of the satellite imagery.
- Address challenges posed by Impulse noise to enhance the visual interpretation and analysis of satellite data.

Disease Prediction System using Random Forest (04/2023 - 05/2023)

- When an issue occurs, people often want to look it up on the internet. Hospitals and physicians have less access to the internet than the general public.
- When people are afflicted with an illness, they do not have many options. As a result, this system can be beneficial to people.

Hotel Management System using JAVA (01/2024 - 01/2024)

- The system allows users to check room details, including features and availability, for different room types—Luxury Double, Deluxe Double, Luxury Single, and Deluxe Single.
- Users can book available rooms, perform checkouts, and generate bills for the occupied rooms, considering the room type and any ordered food.
- The program facilitates food ordering for booked rooms, with a menu offering various items. The orders are linked to specific rooms, ensuring a seamless integration of room and food services.

WORK EXPERIENCE

Intern - Front End Developer Anwimac Technology

07/2022 - 08/2022

Udaipur

Achievements/Tasks

- Worked as a FrontEnd intern working with the development team to gain hands-on experience in designing and implementing the user interface of a website.
